

SPRING CHANGE FOR TF350 TRAILED LIVESTOCK FEEDERS

If you are using the TF350 for a molasses based feed, cobs or rolls. You will need to change the spring which is used to open/close the shutter.

1. REMOVE THE GUARD WHICH IS LOCATED UNDER THE DRAW BAR USING A 17ML SOCKET

2. THERE WILL BE A SPRING ALREADY ATTACHED (SEE BELOW) THIS SPRING IS USED FOR A MORE FINER FEED SUCH AS CORN AND ROLLED BARLEY

3. REMOVE THE SPRING BY UNHOOKING IT FROM BOTH ENDS

4. REPLACE THIS WITH THE STRONGER SPRING.

5. ONCE THE SPRING IS SECURE, SCREW THE GUARD BACK ONTO THE TF350 ENSURING ALL BOLTS ARE SECURE.
